Non-Metallic Split Wall Plates

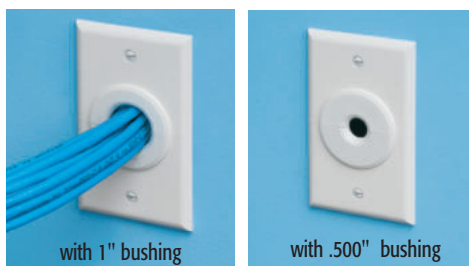

Versatile • Accommodates Pre-connectorized Low Voltage Cable

Two-Gang CESP2

Single Gang CESP1

Arlington's non-metallic **Split Wall Plates** provide a simple yet effective way to accommodate pre-connectorized low voltage cable(s) of varying size and quantity. They work with pre-existing low voltage cables too.

Our versatile single- and two-gang split wall plates come with multiple grommets that effectively size and cover the hole or opening in drywall.

Use them as shipped – with a 1-1/2" opening in the single gang **CESP1**, and a 2" opening in the two-gang **CESP2**. Or add one of the supplied bushings to alter the size of the opening.

- **Single gang CESP1** has 1-1/2" opening. Comes with (3) bushings for .312" • .500" • 1" openings
- **Two-gang CESP2** has 2" opening and comes with (2) bushings for .750" • 1.250" openings
