

THE **SPACER**TM Cable Spacer

NEW!
more on
reverse

Non-metallic • Holds up to Eight 14/2 Cables

Complies with
article 300.4(d) of
2011 NEC

*The SPACERTM holds a single or
double row of cables - centered on a 2x4!*

The SPACERTM, Arlington's new, non-metallic Cable Spacer holds power or low voltage cable secure and centered on a 2x4. Perfect for routing, fastening and positioning power or datacom cable, it holds a single or double row of *up to eight* cables securely between the forks.

Installation is quick and easy. Just nail or screw **The SPACER** to a wood or metal stud.

- Centers cable on a 2x4 stud
- Complies with article 300.4(d) of the 2011 NEC
- Holds cables individually, preventing heat build-up
